

12/5 meeting note

Works remain:

1. Complete makefile, link all file together including testing part
2. Complete all testing code
3. Debug all code
4. Optimize the program performance and improve the program usage
5. Finish all commenting in the code section
6. Write a final report and README file
7. Complete a video presentation

Works done in the past week:

1. Preliminary simple program and simple makefile completed and debugged
2. First draft of main() function completed
3. More test cases added
4. Prim's algorithm, BFS, and Graph implementation code debugged.
5. Mid-point check-in with mentor
